### SECTION 10.39 - RESIDENTIAL AREAS (INCLUDING PRIVATE DOCKS AND PIERS)

10.39.1. Fixtures using lamps (bulbs) of 100 watts or less (or equivalent), such as typical porch lights, may be installed at any location in residentially zoned areas except those located within sea turtle protection areas.

10.39.2. Unshielded floodlights installed for security and activated by motion sensors are permitted. All other floodlight fixtures must have top and side shields capable of containing light below the roofline of the house and reducing light trespass on adjoining properties.

10.39.3. Area Lights, or dusk-to-dawn lights are permitted. These lights must be equipped with a skycap to control glare and to prevent uplighting.

10.39.3.1. If pole-mounted, the fixture mounting height may be no more than 20 feet above grade at the base of the pole.

10.39.3.2. If wall-mounted, the fixture mounting height may be no more than 16 feet above grade, or 16 feet above any deck or porch of houses constructed on pilings.
