

Stormwater Accessory Structures (Garages, Patios, Sheds, Sunrooms) Appendix AS (revised 8/2022)

Name: _____

Address: _____

Property Address: _____

Proposed Accessory Structure is? __garage, __patio, __shed, __sunroom, or __other
Briefly describe the proposed Accessory Structure project: _____

Size of proposed Accessory Structure (width x length to nearest ½ ft.): _____

Is your proposed Accessory Structure: __prefabricated or __built on site

Are you planning additional impervious structures with the Accessory Structure project including: __concrete floors & sidewalks, __patio blocks, __pavers, __decking, or __other?

Are any of the materials proposed permeable such as permeable concrete or washed gravel?
Please briefly describe: _____

All patio blocks, artificial turf, pavers, stepping-stones, & their base materials will need manufacturer's data sheets and testing results showing permeability rates according to ASTM standards. These materials will need pre-approval as permeable from the Stormwater Administrator. Pervious materials may be allowed but will be calculated against the property's total impervious percentage (%) which cannot exceed 45%.

- Stormwater permit fees for Accessory Structures will be: \$100 (Garages, Patios, Pools, Sheds, Sunrooms)
- Accessory Structures may require sediment/erosion control plan review \$200 depending on project size and/or site conditions.
- The violation for starting work without an approved permit is at least double that permit fee.

Applicant Signature

By signing the Stormwater Accessory Structures (Appendix AS), I as the applicant/owner/agent attest that the information provided herein is true and correct to the best of my knowledge. I certify this application is being made with the full knowledge, understanding, and consent of all owners of the affected property.
